## NUMBER 1, JULY 1981

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Editorial . . . . .                                                                                                                                | 1   |
| <b>Moran, T. P.</b> The Command Language Grammar: a representation for the user interface of interactive computer systems . . . . .                | 3   |
| <b>Young, R. M.</b> The machine inside the machine: users' models of pocket calculators . . . . .                                                  | 51  |
| <b>Barnard, P. J., Hammond, N. V., Morton, J., Long, J. B. and Clark, I. A.</b> Consistency and compatibility in human-computer dialogue . . . . . | 87  |
| Book review . . . . .                                                                                                                              | 135 |

## NUMBER 2, AUGUST 1981

|                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Baron, R. J.</b> Mechanisms of human facial recognition . . . . .                                                                             | 137 |
| <b>Ibrahim, R. L. R.</b> A computer system for axiomatic investigation . . . . .                                                                 | 179 |
| <b>Czogała, E. and Pedrycz, W.</b> Some problems concerning the construction of algorithms of decision-making in fuzzy systems . . . . .         | 201 |
| <b>Fox, J.</b> Towards a reconciliation of fuzzy logic and standard logic . . . . .                                                              | 213 |
| <b>Pinkava, V.</b> Classification in medical diagnostics: on some limitations of Q-analysis . . . . .                                            | 221 |
| <b>Johnson, J. H.</b> A critique of the paper "Classification in medical diagnostics: on some limitations of Q-analysis" by V. Pinkava . . . . . | 239 |
| Call for papers . . . . .                                                                                                                        | 249 |

## NUMBER 3, OCTOBER 1981

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Introduction . . . . .                                                                                            | 251 |
| <b>Havránek, T.</b> The present state of the GUHA software . . . . .                                              | 253 |
| <b>Havránek, T.</b> The GUHA method in the context of data analysis . . . . .                                     | 265 |
| <b>Rauch, J.</b> Main problems and further possibilities of the computer realization of GUHA procedures . . . . . | 283 |
| <b>Pokorný, J. and Rauch, J.</b> The GUHA-DBS Data Base System . . . . .                                          | 289 |
| <b>Vlček, V.</b> An application of the GUHA method to chemical engineering . . . . .                              | 299 |
| <b>Ivánek, J.</b> Some examples of transforming ordinal data to an input for GUHA-procedures . . . . .            | 309 |
| <b>Springsteel, F.</b> Complexity of hypothesis formation problems . . . . .                                      | 319 |

|                      |                                                                            |     |
|----------------------|----------------------------------------------------------------------------|-----|
| <b>Havránek, T.</b>  | Formal systems for mechanized statistical inference                        | 333 |
| <b>Hájek, P.</b>     | Decision problems of some statistically motivated monadic modal<br>calculi | 351 |
| <b>Announcements</b> |                                                                            | 359 |

NUMBER 4, NOVEMBER 1981

|                         |                                                                                                                       |     |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------|-----|
| <b>Hoc, J. M.</b>       | Planning and direction of problem solving in structured program-<br>ming: an empirical comparison between two methods | 363 |
| <b>Hisdal, E.</b>       | The IF THEN ELSE statement and interval-valued fuzzy sets of<br>higher type                                           | 385 |
| <b>Johnson, J. H.</b>   | The Shomotopy Bottle of Q-analysis                                                                                    | 457 |
| <b>Edmonds, E. A.</b>   | Domains of interest in fuzzy sets                                                                                     | 461 |
| <b>Nickerson, R. S.</b> | Why interactive computer systems are sometimes not used by<br>people who might benefit from them                      | 469 |
